Professional Summary

Software Engineering graduate with a strong interest in web and mobile development. Passionate about understanding how complex systems are designed, implemented, and optimised in real-world environments. Enjoy analysing existing codebases, improving solutions, and building reliable, maintainable software. Quick to learn new technologies and a collaborative team contributor who enjoys building meaningful, well-engineered products.

Skills Summary

- Team Collaboration
- Communication
- Web/Mobile Development
- Full-Stack Development
- Database Management
- Adaptability
- Self-Learning
- Time Management
- Debugging & Troubleshooting

Work Experience

Team Member
The Warehouse Group | 2024 – 2026

- Assisted customers with enquiries using clear and professional communication.
- Worked efficiently under pressure in high-demand periods.
- Collaborated with team members to meet operational deadlines.

Software Developer Intern
Connect – Digital Services, University of Auckland | 2022–2023

- Developed backend REST APIs using TypeScript and Node.js to support Angular applications.
- Implemented server-side validation, authentication logic, and database queries.
- Designed and maintained MySQL and NoSQL data models.
- Collaborated in an Agile team using Git-based workflows.
- Assisted with AWS-based deployment and cloud configuration.

Education

Bachelor of Engineering (Honours) in Software Engineering
University of Auckland | 2020 – 2023

Technical Skills

Languages: TypeScript, JavaScript, Python, C#, Java, SQL, HTML/CSS

Frontend: React, Angular

Backend: Node.js, Express, REST APIs, CRUD operations, middleware, JWT authentication, asynchronous programming

Mobile Development: Android Studio, React Native

Databases: MySQL, MongoDB, Firebase, DynamoDB

Cloud & Tools: AWS, Git, GitHub, Postman, NPM, Unity

Project Experience

MERN Stack Applications

- Built full-stack applications using MongoDB, Express, React, and Node.js.
- Designed REST APIs, implemented authentication, and structured database schemas.

SPCA Dog Logging System

- Developed a web-based record management system with persistent data storage and API integration.
- Worked with database operations and CRUD functionality to maintain application data.

Android Shopping App

- Built a mobile shopping application using Android Studio.
- Implemented user interface components and application navigation.
- Gained experience with Android development concepts and mobile application structure.

React Native Personal Projects

- Explored cross-platform mobile development using React Native.
- Developed simple applications and experimented with reusable components and state management.
- Learned mobile UI design principles and the workflow for building apps for multiple platforms.
