Career Objective

I am a Software Engineering graduate and I want to delve into web development. I love coding and am interested in seeing the inner workings of fully fleshed systems. I enjoy learning new skills, solving problems, analysing solutions and how things work in general. This translates to coding, inspecting existing code and learning how they function. I like working in teams and sharing cool ideas with others and want to help create something worthwhile.

Technical Skills

JavaScript/TypeScript

- Frontend with HTML/CSS along with React and Angular.
- Used TypeScript during my internship for building an employee/employer management system and fixing/maintaining current systems.
- Used both in most of my final year software projects. Some notable ones:
    - Location-based game using MERN stack
    - Capstone project – SPCA website for logging information of dogs
    - React application – an employee management app with database
- Continuous learning and usage in ongoing personal projects.

Python

- Mainly used for data analysis in most university projects.
- Machine learning for traffic image recognition in a mini robot vehicle.
- Project that synchronises two chosen directories (all files within) and any subdirectories.

C#

- Used in Unity and Unity VR university projects:
    - Spatial skills training game on desktop and virtual reality.
    - Traffic simulation with drivers having simulated vision.
    - Virtual pet game for research and user studies.

Java

- Gained experience in object-oriented programming by developing a game with a GUI object-oriented design for university projects.
- Used for developing an Android shopping application.

Others: Git, Angular, Express, Node.js, Python, Android Studio, SQL, MongoDB, Firebase, DynamoDB

Work Experience

The Warehouse Team Member (2024 - present)
Working as a night-fill team member at The Warehouse - Albany. Restocking shelves and making sure the store is ready for the next day. Also handle and resolve customer queries up to closing time.

Software Developer Intern (2022 – 2023)
Interned at Connect – Digital Services at the University of Auckland. Did backend web development using Typescript and worked together with the frontend team. Also gained some experience with AWS and project deployment.

Cleaner (2022)
Cleaned offices and other workplaces throughout Auckland CBD. Worked with other people and sometimes worked alone.

Babysitter (2020 – 2021)
Was responsible for taking care of two children, cooking them meals, and taking them out for bicycle rides.

Education

University of Auckland, New Zealand (2020 – 2023)
Bachelor of Engineering (Honours) in Software Engineering

Personal Summary

I am a friendly person who loves learning about programming. I enjoy spending time with my friends and family. In my free time, I work on my own coding projects and chat with friends online. I am a proactive team player who can work well with others or by myself. I listen well and understand my teammates' views. I have a relaxed attitude, making me easy to talk to.
